

To – do list

Create a Python program that allows a user to manage a to-do list through the Command Line Interface (CLI). The program should allow the user to add tasks, remove tasks, view all tasks, and mark tasks as completed. Use Python lists to store the tasks.

Expected Outcome:

1. The program should display a menu with the following options:
 - Add a task
 - Remove a task
 - View all tasks
 - Mark a task as completed
 - Exit the program
2. When the user selects "Add a task," the program should prompt the user to enter the task description and add it to the list.
3. When the user selects "Remove a task," the program should display the current tasks with their corresponding numbers and ask the user to enter the number of the task they want to remove.
4. When the user selects "View all tasks," the program should display all tasks in the list, showing whether each task is completed or not.
5. When the user selects "Mark a task as completed," the program should display the current tasks with their corresponding numbers and ask the user to enter the number of the task they want to mark as completed.
6. The program should continue running until the user chooses the "Exit" option.
7. The final output should be a functional CLI-based to-do list manager that meets the above criteria.

Main menu

```
--- To-Do List Manager ---
1. Add a task
2. Remove a task
3. View all tasks
4. Mark a task as completed
5. Exit

Please select an option (1-5):
```

View all tasks

```
1  --- Your To-Do List ---
2  1. [ ] Buy groceries
3  2. [x] Finish homework
4  3. [ ] Clean the room
5  4. [ ] Call a friend
6
7  [x] = Completed, [ ] = Not Completed
```

Add a Task

```
1  --- Add a Task ---
2  Enter the task you want to add: Study for the math test
3
4  Task "Study for the math test" has been added successfully!
```

Remove a Task

```
1  --- Remove a Task ---
2  Here are your current tasks:
3  1. [ ] Buy groceries
4  2. [x] Finish homework
5  3. [ ] Clean the room
6  4. [ ] Call a friend
7
8  Enter the number of the task you want to remove: 3
9
10 Task "Clean the room" has been removed successfully!
```

Mark a Task as Completed

```
1  --- Mark a Task as Completed ---
2  Here are your current tasks:
3  1. [ ] Buy groceries
4  2. [ ] Study for the math test
5  3. [ ] Call a friend
6
7  Enter the number of the task you want to mark as completed: 1
8
9  Task "Buy groceries" has been marked as completed!
```

Exit the Program

```
1  --- Exit ---
2  Thank you for using the To-Do List Manager. Goodbye!
```
